

| UVSim GUI   |  |
|---|--|
| <div> <div></div> <div>[INPUT FILE ]</div> <div></div> </div> |  |
| [Run]   |  |
| [Show opertors]   |  |
| [Exit]  |  |
| [Reset]   |  |

- The Input file part will be where you can input the file name with instructions.
- When you put the file name in the input file, You then click the Run button, to run operations
- The show operators button will display all of the possible operations the program can take
- The exit button will close the entire program when you click it.
- When you click the reset button the entire program will be reset, and you can run files again.
